INTRODUCTION

With the expanding penetration of internet in our country, every industry is making presence online and so is the food industry. So we have made a website for a restaurant to help the customers know about the services of the restaurant. In the website we made, customers can see the menu available in the restaurant. They can reserve a table in the restaurant for family dine out or any official meets or even can throw party to their friends and families by booking the whole restaurant. They can also provide their valuable feedback about their experience with the restaurant's service.

We hope you would like our project.
